Government IT Solutions

Modernize your government agency

Give your staff and your constituents a better experience by leaving outdated, legacy applications in the past. Increase efficiency and lower IT costs by updating the way your government agency runs digitally. All while ensuring you comply with security standards and you're prepared to easily recover critical data (if needed).

42%

of agencies spend more than a quarter of their IT budgets maintaining legacy systems.

Security and Compliance

Cloud Implementation

Leave behind the days of worrying about losing important documents. Cloud computing will increase collaboration, efficiency, and security for your staff, while giving you more control over document access.

IT Infrastructure Consulting

Cater your IT solutions to your agency's needs. OnPoint ONE will assess and recommend the most fitting IT solutions for the best outcomes.

Device Management

Increase productivity while making sure permissions and accessibility restrictions fit the needs of employees without sacrificing security, where ever your staff are working.

Risk Management & Security Compliance

Maintain security standards, implement data recovery precautions, and comply with your agency's guidelines, so you keep your data safe.
